Fabrizio Bonafina

Senior Full-Stack .NET Developer | AI Automation & Agents in Production

Valencia, Spain · fabrizio.bonafina@gmail.com · linkedin.com/in/fabrizio-bonafina · fabrobona.github.io/portfolio

PROFESSIONAL SUMMARY

Senior Full-Stack .NET Developer with 6+ years building web and desktop applications for international companies (C#, ASP.NET Core, Angular, React, SQL Server). Beyond development, I design and implement AI automation solutions (n8n, Power Automate, Copilot Studio, LLM agents) that solve real business processes — including my own production system that integrates generative AI (Gemini) to process documents, voice and financial transactions autonomously. I combine product judgment (prioritizing by business value) with end-to-end technical execution.

FEATURED PROJECTS

AppControl — Personal finance platform with AI (personal project, in production since 2026)

Solo design and development of a full-stack application (Next.js, Supabase/PostgreSQL, Edge Functions) that manages personal finances in real time.

- Telegram bot with generative AI (Gemini) that reads receipt photos and transcribes voice messages to categorize expenses automatically, with no manual input.
- Automatic transaction categorization engine and bank synchronization via API (Enable Banking).
- Automated financial alerts and reports through cron jobs, with security auditing of serverless functions (RLS, access control).
- Stack: Next.js, TypeScript, Supabase, PostgreSQL, Edge Functions, Telegram Bot API, Gemini API.

Appointment Manager — public code sample (github.com/fabrobona/turnos-dotnet-angular)

- ASP.NET Core 8 REST API with Clean Architecture (Domain, Application, Infrastructure, API), MediatR, FluentValidation, EF Core and uniform error responses (RFC 7807), plus an Angular 20 frontend.
- 65 unit tests and 17 integration tests (xUnit) on the backend and 39 tests on the frontend; Docker Compose and a GitHub Actions CI pipeline.

PROFESSIONAL EXPERIENCE

.NET Software Engineer — Minsait

Valencia · January 2025 – Present

- Analyzed and prioritized technical requirements with end users, translating business needs into scalable solutions.
- Lead developer on strategic projects for the Ministry of Tourism and Industry.
- Implemented CI/CD pipelines and code quality analysis with SonarQube, reducing production errors and speeding up deployments.

.NET Freelance Developer — AI Automation — Aiotek (continuation of the Assist Card project)

June 2026 – Present

- Continuation of the same project and technology stack for Assist Card, invoicing through Aiotek.
- Maintenance and evolution of the insurance portals and automation flows already in production.

.NET Freelance Developer — AI Automation — Assist Card

January 2021 – May 2026

- Development and maintenance of insurance web portals used by numerous agencies, focused on business process automation.
- Designed and implemented, with Dify and Power Automate, an automatic issuance process for a partner agency in Spain, handling a high daily volume of issuances with no manual intervention.
- Designed and debugged Power Automate flows that process insurance certificates in XML and integrate structured data through JSON APIs.

- Resolved critical production incidents (e.g., fixed time-zone handling in the .NET backend that affected promotion expiration).
- Business process automation using SSIS and web scraping.

.NET Developer (Consultant) — The Whiteam
Valencia · April 2023 – December 2024

- Developed .NET applications for key Minsait projects, optimizing critical processes and performance.
- Implemented CI/CD pipelines and SonarQube for faster deployments with fewer production errors.

.NET Developer — Itecnous
Valencia · August 2022 – April 2023

- Custom feature development and project maintenance.

.NET Developer — Hiberus
Valencia · April 2022 – July 2022

- Took part in migrating applications to modern .NET frameworks.

.NET Junior Developer — The App Master / Assist Card
July 2019 – December 2020

- Implemented new features in existing systems.

Systems Operator — IPG MediaBrands
Buenos Aires · May 2018 – July 2019

- Monitoring and maintenance of systems across LATAM.
- Automation of operational tasks.

EDUCATION

- Full-Stack .NET Developer — Educación IT (2020–2021)
- Python Web Developer — Educación IT (2021–2022)
- Electronics Technician — Instituto Hölters Schule (2011–2017)

TECHNICAL SKILLS

AI & Automation:
Prompt Engineering, AI Agents (LLM), Claude Code, GitHub Copilot, Microsoft Copilot Studio, n8n, Power Automate, Dify, LLM Context/Token Management

Full-Stack .NET:
C#, ASP.NET Core, MVC, Entity Framework Core, LINQ, Dapper, MediatR, Clean Architecture, SOLID, Microservices

Frontend:
Angular, React, TypeScript, JavaScript, HTML, CSS

Data & Cloud:
SQL Server, PostgreSQL, Supabase, Azure, Azure DevOps, CI/CD, Git, SSIS

Methodologies:
Scrum, Agile

Other:
Web Scraping, Crystal Reports

LANGUAGES

Spanish: Native · **English:** Intermediate · **German:** Intermediate (DSD A2/B1 certified)
